

Lawn Care Calendar

It is worth noting that the following should be used as a guide only, but in association with prevailing weather patterns, growing cycles, and ground and soil conditions. Lawn care would stop as soon as the frosty nights arrive, although it is possible to turf lawns all year round if it is not too wet and the turf farms are able to harvest the turf. Lawn care can commence in the spring as soon as the frosts have diminished.

Perform the task in the month when the box is shaded	Aerate	Disease	Fertilise	Moss	Mow	Pest	Renovate	Scarify	Seed	Selective Weed	Sulphate of Iron	Top Dress	Turfing	Water
